JIGSAW

Government Degree College for Women, Marripalem is organizing a comprehensive admission campaign for the academic year 2026–27 with the active participation of both teaching and non-teaching staff. The primary objective of this campaign is to create awareness among Intermediate passed students and their parents about the importance of higher education and the opportunities available at our institution. As part of the campaign, teams of faculty members and supporting staff will visit nearby villages, junior colleges, government schools, and residential areas to interact directly with students and parents. Many students in rural and tribal areas are unaware of the educational facilities, scholarship schemes, and career opportunities available through higher education. Therefore, the campaign aims to bridge this information gap and encourage more young women to pursue degree education. During the village visits, staff members will explain the various undergraduate programmes offered by the college, the admission process, eligibility criteria, fee reimbursement schemes, scholarships, and student support services. Special emphasis will be given to the benefits of educating girls and empowering women through higher education. The campaign will also highlight the safe and supportive learning environment available in the college, along with opportunities for personality development, skill enhancement, sports, cultural activities, NSS programmes, and career guidance. The campaign team will conduct meetings with parents, community leaders, self-help groups, and local youth organizations to emphasize the long-term benefits of higher education. Success stories of former students who have achieved academic excellence and secured employment or higher education opportunities will be shared to motivate prospective students. Pamphlets, brochures, banners, and publicity materials containing details of courses, facilities, and admission schedules will be distributed during the campaign. Information will also be disseminated through social media platforms and WhatsApp groups to reach a wider audience. Through this admission campaign, Government Degree College for Women, Marripalem seeks to increase enrollment, reduce the dropout rate among girl students, and contribute to the educational and social development of the surrounding rural and tribal communities. The collective efforts of the teaching and non-teaching staff will play a significant role in guiding students towards a brighter future through higher education.
